

**BEST AVAILABLE COPY****PART I. AMENDMENTS TO THE SPECIFICATION**

IN THE SPECIFICATION, please amend / modify paragraph [0039] as follows:

[0039] Referring now to FIG. 5 in conjunction with FIG. 4, there is shown the Client Remote-Control Synchronization methods and systems according to another aspect of the present inventions. As shown in FIGS. 4 and 5, the home computer and Web browser 204 is provided with hardware and software application system for receiving and responding to signals transmitted from the remote control unit 601, as described hereinbelow. When the home user uses the remote control 601 to switch TV channels, the wireless signals 603 and 602 transmitted therefrom thereof will be received by ~~both~~ the home TV 212 and the home computer 204 respectively. In response thereto, the TV channel will be switched in a conventional manner, and in the meantime, the Web site and/or web page accessed by the computer 204 will also be switched to the designated Web site / web page of the new TV channel or program. In FIG. 5, the web site function 200a is the operation function of the web site 300 of FIG. 4; the function of TV Broadcast Station 208a is the operation function of the TV broadcast unit 208 of FIG. 4; and signal 214s is equivalent to the signal 214 of FIG. 4.
